

Topic LIFE-2022-CET-ENERPOV

Addressing building related interventions in vulnerable districts

Silvia Vivarelli, CINEA Unit D1

Objectives

Type of action: **Other Action Grants - CSA (95%)**

- Around 34 million people unable to keep their homes adequately warm
- Key risk factors: poor energy efficiency of dwellings, high energy expenditure and low incomes
- **Address energy inefficiency of housing stock in vulnerable districts and reduce the negative effects on residents**
- Support to implementation of:
 - Renovation Wave
 - Commission Recommendation on Energy Poverty
 - Clean Energy for all Europeans package (EPBD, EED)

Scope (1/3)

Facilitate uptake of renovation approaches for large-scale rollout of building-related interventions (effective and replicable)

Vulnerable
districts

Clusters of buildings
with vulnerable
residents

Groups of
buildings with
common
management

Scope (2/3)

Type of housing
targeted to be
clearly identified

Proven solutions
delivering
significant energy
savings

Occupant behavior
and residents' buy-
in to be built into
strategy

Avoid gentrification

Multiple benefits
from renovation

Involve local
authorities and
intermediaries

Scope (3/3)

Proposed approaches should be one or more of the following:

Supporting the renovation of private multi-apartment buildings

Develop and implement roadmaps of energy renovation

Rolling out holistic, industrialised deep renovation solutions

Expected impacts for energy poor households

- Number of dwellings renovated
- Number of roadmaps developed
- Number of energy poor consumers impacted
- Multiple benefits of building energy renovations, such as improved physical and mental health, comfort and indoor environment, better indoor air quality, improved social inclusion, reduced public health expenditure
- Primary energy savings triggered by the project (in GWh/year)
- Renewable energy generation triggered by the project (in GWh/year)
- Investments in sustainable energy triggered by the project (cumulative, in million Euro)

Key considerations for topic

- Focus on building related interventions
- Focus on vulnerable districts and/or groups of buildings → specific needs
- Ensure involvement of all relevant actors (e.g. local authorities, tenants/homeowners/housing associations, societal/social actors, energy communities)
- Take into account residents' support and their post-intervention behaviour
- Build on previous and existing initiatives and project results
