

LIFE-2024-CET-SAP

Clean Energy Transition 'Standard Action Projects'

LIFE CET Info Day, 25 April 2024

Anette Jahn

LIFE Energy + LIFE Climate, CINEA

Context and aim – Standard Action Projects

- develop, demonstrate and promote **innovative techniques, methods and approaches**
- contribute to the **knowledge base** and to the application of **best practices**
- support [] relevant Union legislation and policy, including by improving governance at all levels, in particular through enhancing **capacities of public and private actors** and the involvement of civil society
- **catalyse the large-scale deployment of successful technical and policy related solutions** for implementing the relevant Union legislation and policy

Context and aim of standard action projects in LIFE CET

- Flexible topic to support actions from key commercial and non-commercial actors of the energy transition
- Preferably ‘close to market’, i.e. take up solutions, market-oriented approach

Contribute to the implementation of the EU’s energy efficiency and renewable policy/legislation

Challenges and needs based on clean energy transition project experiences:

- Reinforce **skills and service models** to deliver and implement the energy transition
- Build on **experience** and **know-how** from frontrunners

- Make sure that **market solutions are taken up** by society
- Contribute to the **overall clean and fair** energy transition

Scope: Support to key actors

Local and regional authorities to establish **new energy agencies**

Support Energy Service Companies in piloting and rolling-out ambitious investment and financial solutions for deep renovation

Financial institutions, brokers, insurers, PPP's and other actors in developing financial products and solutions

EU manufacturers of net-zero energy technologies to roll out innovative techniques

Expected impact

- Contribute to the implementation of the EU's energy efficiency and renewable policy/legislation
- Concrete results, impact on relevant markets and stakeholders – highlight specific market-related information in your application

Proposals are not expected to address all indicators – **only as relevant**

Indicators

Topic-specific

- Number of **pieces of legislation, policies, or strategies** created/adapted to support sustainable energy policies
- Number of **products** (goods or services), **processes and methods** launched into the market
- Number of **real-life implementation sites** carried out by the project
- Number of **stakeholders trained** with increased clean energy transition skills and competencies
- Number of **stakeholders reached**
- Number of **jobs** created

Common indicators

- Primary energy savings
- Final energy savings
- Renewable Energy triggered
- Investment in sustainable energy

Activity-specific

- To be determined/proposed by proposer
- xxx

Topic budget and expected EU contribution

- 60% co-funding
- Indicative budget for the topic € 4 million
- EU contribution (expected): up to € 1,5 million per proposal
- At least 1 applicants(beneficiaries) from an eligible country
