Towards a zero emission building stock: strengthening the enabling framework for deep renovation

LIFE Clean Energy Transition 2022 EU Info Days

*Ana Sin Bagüés, Project Adviser
Unit D1 – LIFE Energy & Climate, CINEA*

Towards a ZEB stock: Strengthening the enabling framework for deep renovation

- Other Grants type of action – 95% co-funding
- Indicative budget for the topic € 6 million
- EU contribution up to € 1.75 million per proposal would allow objectives to be addressed, (this does not preclude submission and selection of proposals requesting other amounts)
- Minimum 3 applicants from 3 different eligible countries

Objectives

- Double annual energy renovation rate by 2030
- Increase level of energy savings delivered by renovations - deep renovation
- Zero emission building stock by 2050
- Reduce energy dependence

Towards a ZEB stock: Strengthening the enabling framework for deep renovation

3 areas of action to remove obstacles and foster deep renovation

Roll out renovation passports for staged renovation

Adaptation of legal, administrative and funding frameworks

Improve coordination of supply market actors

Towards a ZEB stock: Strengthening the enabling framework for deep renovation

Scope - Area 1 - Renovation passports for buildings

- Facilitate introduction and roll-out of renovation passports for staged renovation
- Clear roadmap for owners and investors, defining scope and timing of interventions
- Solutions: reliable, cost-competitive, affordable, IEQ, safety + ↓ disturbance
- Coordinate with and link to existing support, funding schemes, one-stop-shops or services, EPC, etc.
- Align with EU and national frameworks for introduction of renovation passports, where available

Towards a ZEB stock: Strengthening the enabling framework for deep renovation

Scope - Area 2 - Adapting legal, administrative and funding framework

- Remove barriers to building energy renovation and facilitate deep renovation
- Adapt legal and regulatory framework, administrative procedures, procurement rules, existing support schemes, funding frameworks, etc.
- Well aligned with the geographical area and context
- Involve relevant public authorities and help them “build the case”

Towards a ZEB stock: Strengthening the enabling framework for deep renovation

Scope - Area 3 – Improve coordination of market actors

- Improve coordination between actors in the supply side of renovation works (SMEs, individual craftspeople)
- Establishment of partnerships, consortia and deliver long-lasting business and collaboration models enabling deep renovations
- Reduce risks and transaction costs for companies, support for contractual liabilities, joint quotes delivery, information sharing, showcasing integrated offers to potential customers, etc.)
- Ensure uptake in the targeted markets, e.g. professional organisations

Towards a ZEB stock: Strengthening the enabling framework for deep renovation

Impacts

- Increased roll out of renovation passports supporting staged deep renovation
- Improvements in the legal, policy and funding frameworks for deep renovation
- Improved and/or new collaborations, partnership and consortia across trades and professional groups to deliver high quality deep renovation

Indicators

- ↑ rate and # of deep renovations in territory
- # of buildings equipped with a renovation passport
- # of public authorities adapting their legal, policy and funding frameworks
- # of private companies benefiting from improved coordination
- Primary energy savings
- Renewable energy generation
- Investments in sustainable energy triggered
