1.11. Transfers of personal data to third countries or international organisations

Not applicable

1.12. Description of security measures

The personal data of users is collected from three different sources:

- The European Commission active directory services (read-only access);
- The CINEA ticket system and the loans management system, internal applications
- Paper forms (IT equipment loans, Request for access to information systems or IT resources).

Personal data is stored electronically and in paper and accessible only by the authorized personnel for the purposes of the processing on a need to know basis. Access is granted only if there is a clearly specified administrative purpose, and only to those whose role and level of responsibility require them to have access. IT staff having access to the data is bound by confidentiality.

Electronic information is stored in networks drives, whose access is governed by the access rights policy of CINEA. By default the information is classified "internal" for CINEA staff. Folders with limited or confidential information are marked as "restricted area" of "confidential" and they are accessible only by the authorised users.

Access to personal data is restricted on an individual need to know basis. Electronic data is password protected and resides on servers of the European Commission, which implement adequate security measures to protect the security and integrity of the relevant electronic assets. The login and the passwords are managed by the common

certification service of the European Commission. CINEA is bound by Commission Decision 2017/46 of 10/1/17 on the security of communications & information systems in the EC.

Only the system administrators can operate the daily/monthly back-ups. The data of the offsite full back-up is stored in tapes kept in a safe at CINEA's premises. The data of the normal back-ups is directly kept in the robot in the servers' room. Only the system administrators can operate the daily/monthly backups. The system administrators are statutory staff bound to the rules of staff regulations on good administrative behavior.

Local CINEA applications reside within the European Commission's network boundary so they are subject to the same protection as corporate systems. Paper records are stored in the secured premises of CINEA (locked room/cupboard).
