

# Award Criteria Part II

## Scalability

**María ALFAYATE**

**Deputy Head of Unit – Innovation Fund Unit  
CINEA**

# Scalability

Objective: assess the scalability and the knowledge sharing

Scalability in terms of efficiency gains

Scalability in terms of further technology or solutions deployment

+

Quality and extent of the knowledge sharing

Follow the guidance provided in the Application form, section 4

- Efficiency gains:
  - expected technology **cost reductions**;
  - **efficient use of resources** or other ways to address resource constraints notably in terms of **reduction of use** and **more efficient use** of critical raw materials biomass and other scarce resources, and in terms of **circularity, recycling and recyclability** of such resources.
- Scalability in terms of further technology or solutions deployment:
  - at project site and possible transfer to other sites;
  - at sector level, regionally or across the EU economy or globally;
  - potential for technology transfer beyond sector
  - New value chains / reinforce existing ones in Europe
- Knowledge sharing

# Scalability

- Which are the related expected additional emission avoidance?
- What's the impact on economic growth and jobs?
- What's the potential to create new value chains or reinforce existing ones in Europe (development of strategic autonomy in industrial supply chains)? Is there a positive impact on competitiveness?
- For projects to a large degree dependent on subsidies, potential to become cost-competitive and financially viable over time in the absence of subsidies.

# Quality and extent of the knowledge sharing

## Knowledge sharing goals

- ✓ de-risking innovative low-carbon technologies with regard to wide-scale commercialisation
- ✓ acceleration of deployment
- ✓ increasing the undertaking of, and confidence in these technologies by the wider public
- ✓ maintenance of a competitive market for the post-demonstration deployment of the technologies

In the application form Part B, section 4:

- Outline the plan for the activities for knowledge-sharing (e.g. objectives, key messages, target audiences, communication channels, social media plan, and relevant monitoring indicators)
- Describe the communication and dissemination activities planned to promote the activities/results & maximise the impact of the project
