Towards an effective implementation of key legislation in the field of sustainable energy

LIFE CET Info Day, 25 April 2024

Luca ANGELINO, Nathalie CLIQUOT, Ulrike NUSCHELER
LIFE Energy + LIFE Climate, CINEA
## LIFE-2024-CET-POLICY

### The Basics

| Other Grants type of action – **95% co-funding** | Indicative budget for the topic **€ 6 million** |
| Minimum 3 applicants from **3 different eligible countries** | EU contribution up to **€ 1,75 million** per proposal would allow objectives to be addressed (not precluding submission and selection of proposals requesting other amounts) |
General Scope

Scope, assess and model the impact of implementation options, including non-energy impacts.

Support the monitoring and evaluation of policy implementation.

Sharing of best practices within and across Member States.

Provide support, technical advice and tools for contextualisation and specification of requirements.

- Develop + support approaches for integrated collection of data, calculation/accounting, verification, monitoring, evaluation and reporting across legislation.

- Monitor and model energy and non-energy impacts of integrated solutions; gather data for the energy and buildings sector.
Scope A: Support for the implementation of the Energy Efficiency Directive (EED)

**Energy Efficiency First Principle**, supporting operational implementation and developing assessment methodologies + tools and benchmarks.

**Energy Efficiency targets**, including new methods to collect/integrate sources of data, forecast trends and evaluate policies/measures.

**Energy Savings Obligations + Energy Efficiency Obligation Schemes**, supporting the design/implementation and calculation/evaluation of measures.

**Energy Services**, support for establishing standard contracts + quality control schemes.

Role of the public sector, support for gathering and calculating data from public bodies.
Scope B: Support for the implementation of the Renewable Energy Directive (RED)

Support public authorities in charge of the transposition and implementation of the Directive
Addressing only one of the areas below

1. Permit-granting process
   - Joint development of new tools sharing of best practices, training programmes for speeding up and streamlining permitting procedures through an EU community of practitioners in RES permitting

2. Development of plans designating renewables acceleration areas
   - for one or more broad types of renewable energy sources

3. Update, monitoring and/or evaluation of the implementation of national/regional/local frameworks implementing RED provisions on renewables self-consumption
   - esp. practical implementation of energy sharing by renewable self-consumers in the same building or multi-apartment block or within a wider geographical location and measures to promote it in cooperation with all relevant actors
Scope C: Support for the implementation of the Energy Performance of Buildings Directive (EPBD)

1. Effectiveness and coherence of instruments:
   • Minimum Energy Performance Standards: Develop standards + enabling framework as part of national Building Renovation Plans
   • Cost-optimality: Up-dating of methodologies

2. Transition to a climate-neutral building stock
   • Zero Emission Buildings: Define benchmarks and criteria, support implementation
   • Global Warming Potential: implementation of calculations + working towards EU framework

3. Optimal roll-out of buildings data and information tools
   • EPCs: Rescaling and updating of calculation methodologies; integration with BRP + SRI
   • Buildings Data: Methodologies to collect, aggregate, integrate and report; data governance; design of national databases + data transfer to EU-BSO
## Impacts

<table>
<thead>
<tr>
<th>Proposals should demonstrate how they will contribute to:</th>
<th>Proposals should quantify their impacts using the topic-specific indicators:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased understanding + knowledge in public administrations</td>
<td>✓ No. public authorities with increased capacities and better access to information/ data</td>
</tr>
<tr>
<td>more effective/ consistent implementation of provisions, incl. better planning + evaluation of measures</td>
<td>✓ No. public authorities and stakeholders using tools, resources, information and data provided by activity</td>
</tr>
<tr>
<td>improved data quality and monitoring;</td>
<td>✓ No. policy measures, implementing acts and related documents improved by activity</td>
</tr>
<tr>
<td>improved understanding of potentials and barriers</td>
<td>✓ No. monitoring and reporting tools and documents improved by activity</td>
</tr>
<tr>
<td></td>
<td>✓ No. references in policy-relevant documents, e.g. impact assessments</td>
</tr>
</tbody>
</table>
Project Examples
