Next steps

• CINEA continues to closely monitor the ongoing Actions, with the aim to assist them to accomplish their objectives and to absorb the available funds.

• The 2024 ASR exercise has been launched. Portfolio overview for Transport/Energy will be available by June/July.

• A significant number of final reports/payments is expected in 2024/2025. At the same time, the CEF2 portfolio is growing.
3. **Duration of CEF 2 projects**
747 out of 1070 Transport Actions (70%) and 60 out of 149 Energy Actions (40%) have been formally amended;

In total 1,268 formal amendments have been completed (1,191 for transport and 77 for energy). 322 Actions were formally amended more than once (309 for transport and 13 for energy);

In addition, there were 966 acknowledgements of minor updates and 530 amendment letters;

The duration of 664 Transport Actions (62%) has been extended (average extension: 21 months);

For Energy, 59 Actions (40%) were extended (average extension: 13 months).
CEF2 – approach on extensions

Proposed Treatment of extension requests under CEF2:

• Requests for extensions should, as a general rule, be discussed at the latest possible stage, towards the end of the GA in force. In dully justified cases, extensions may be granted earlier;

• Total extensions should in principle not exceed 12 months for studies and 24 months for works; “Total extensions” means the extension between the end date of the proposal and the end date of the amended GA.
