

# BAPAURA presentation

Covenant of Mayors Investment Forum

18/10/2022

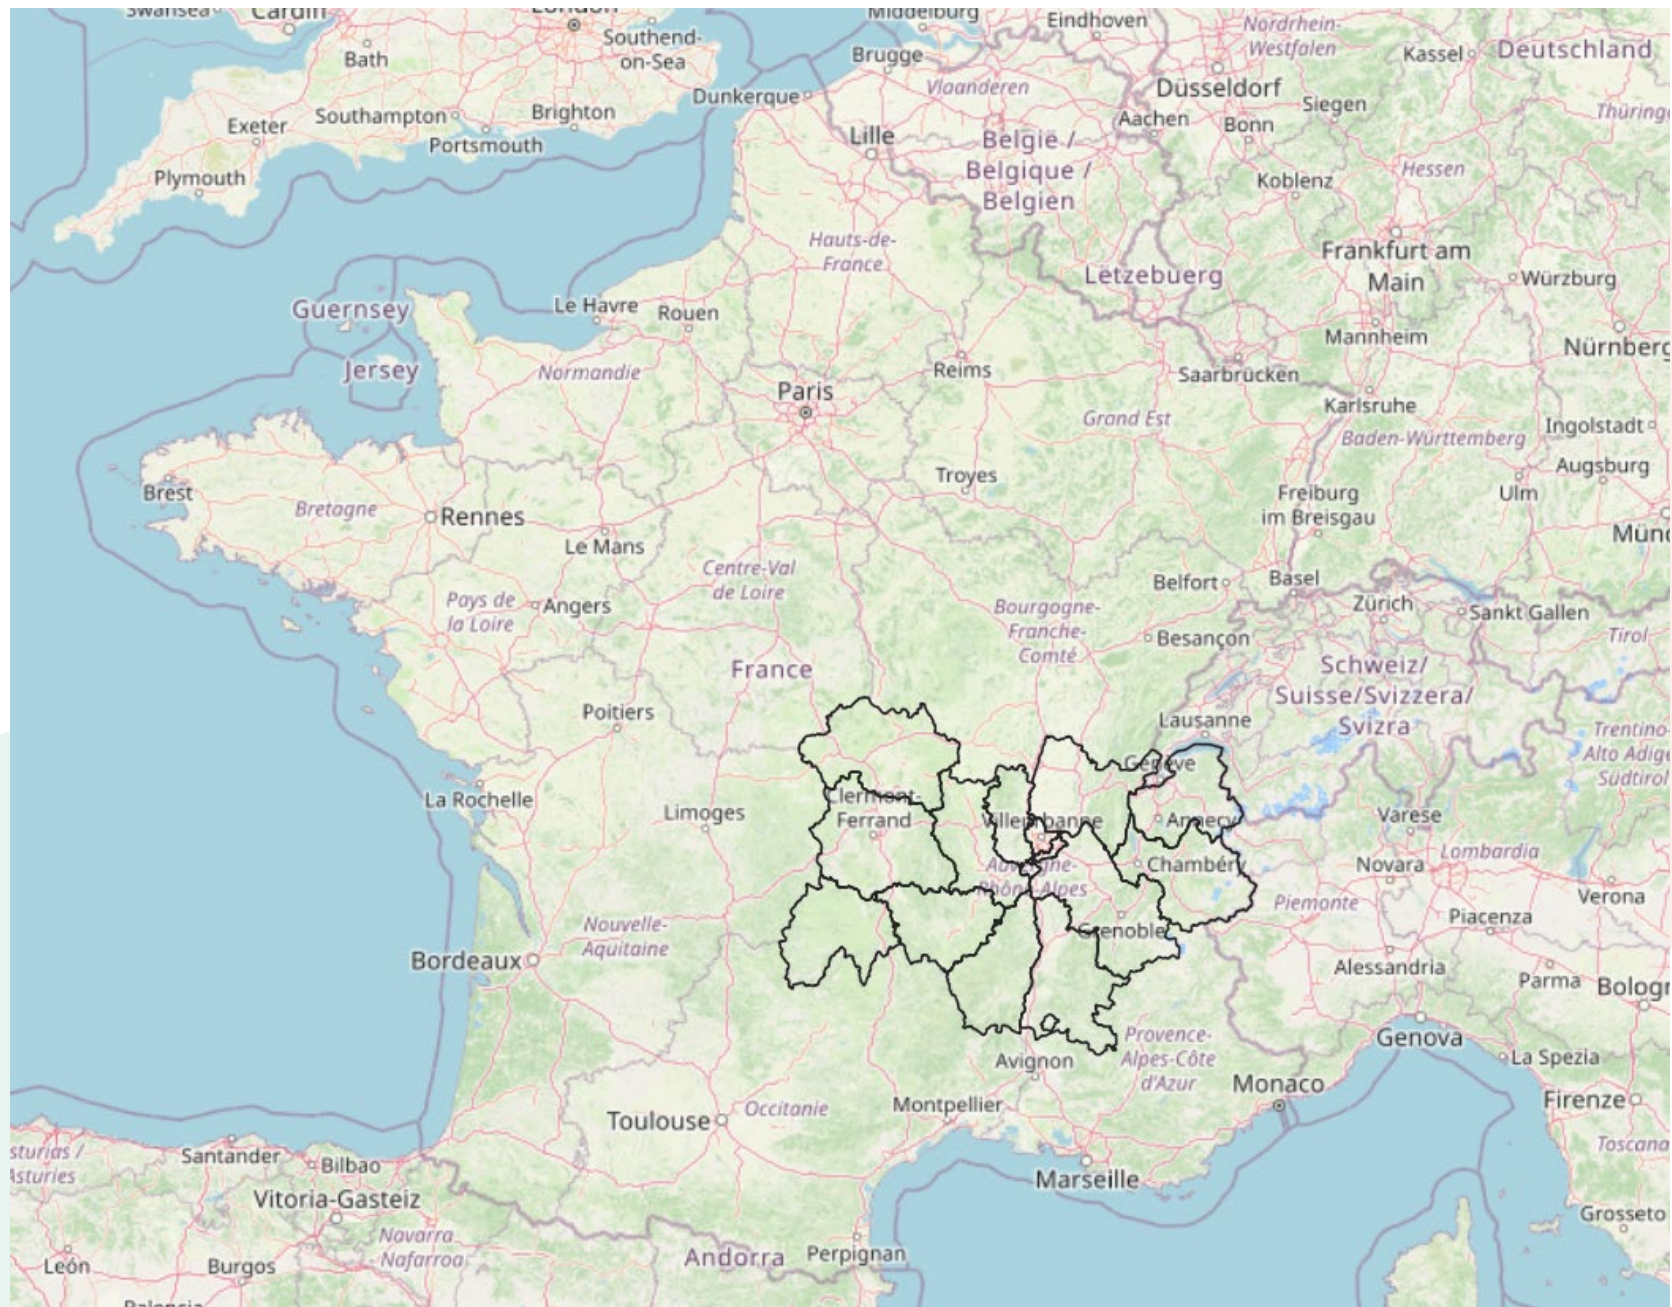

## Objectives of the project

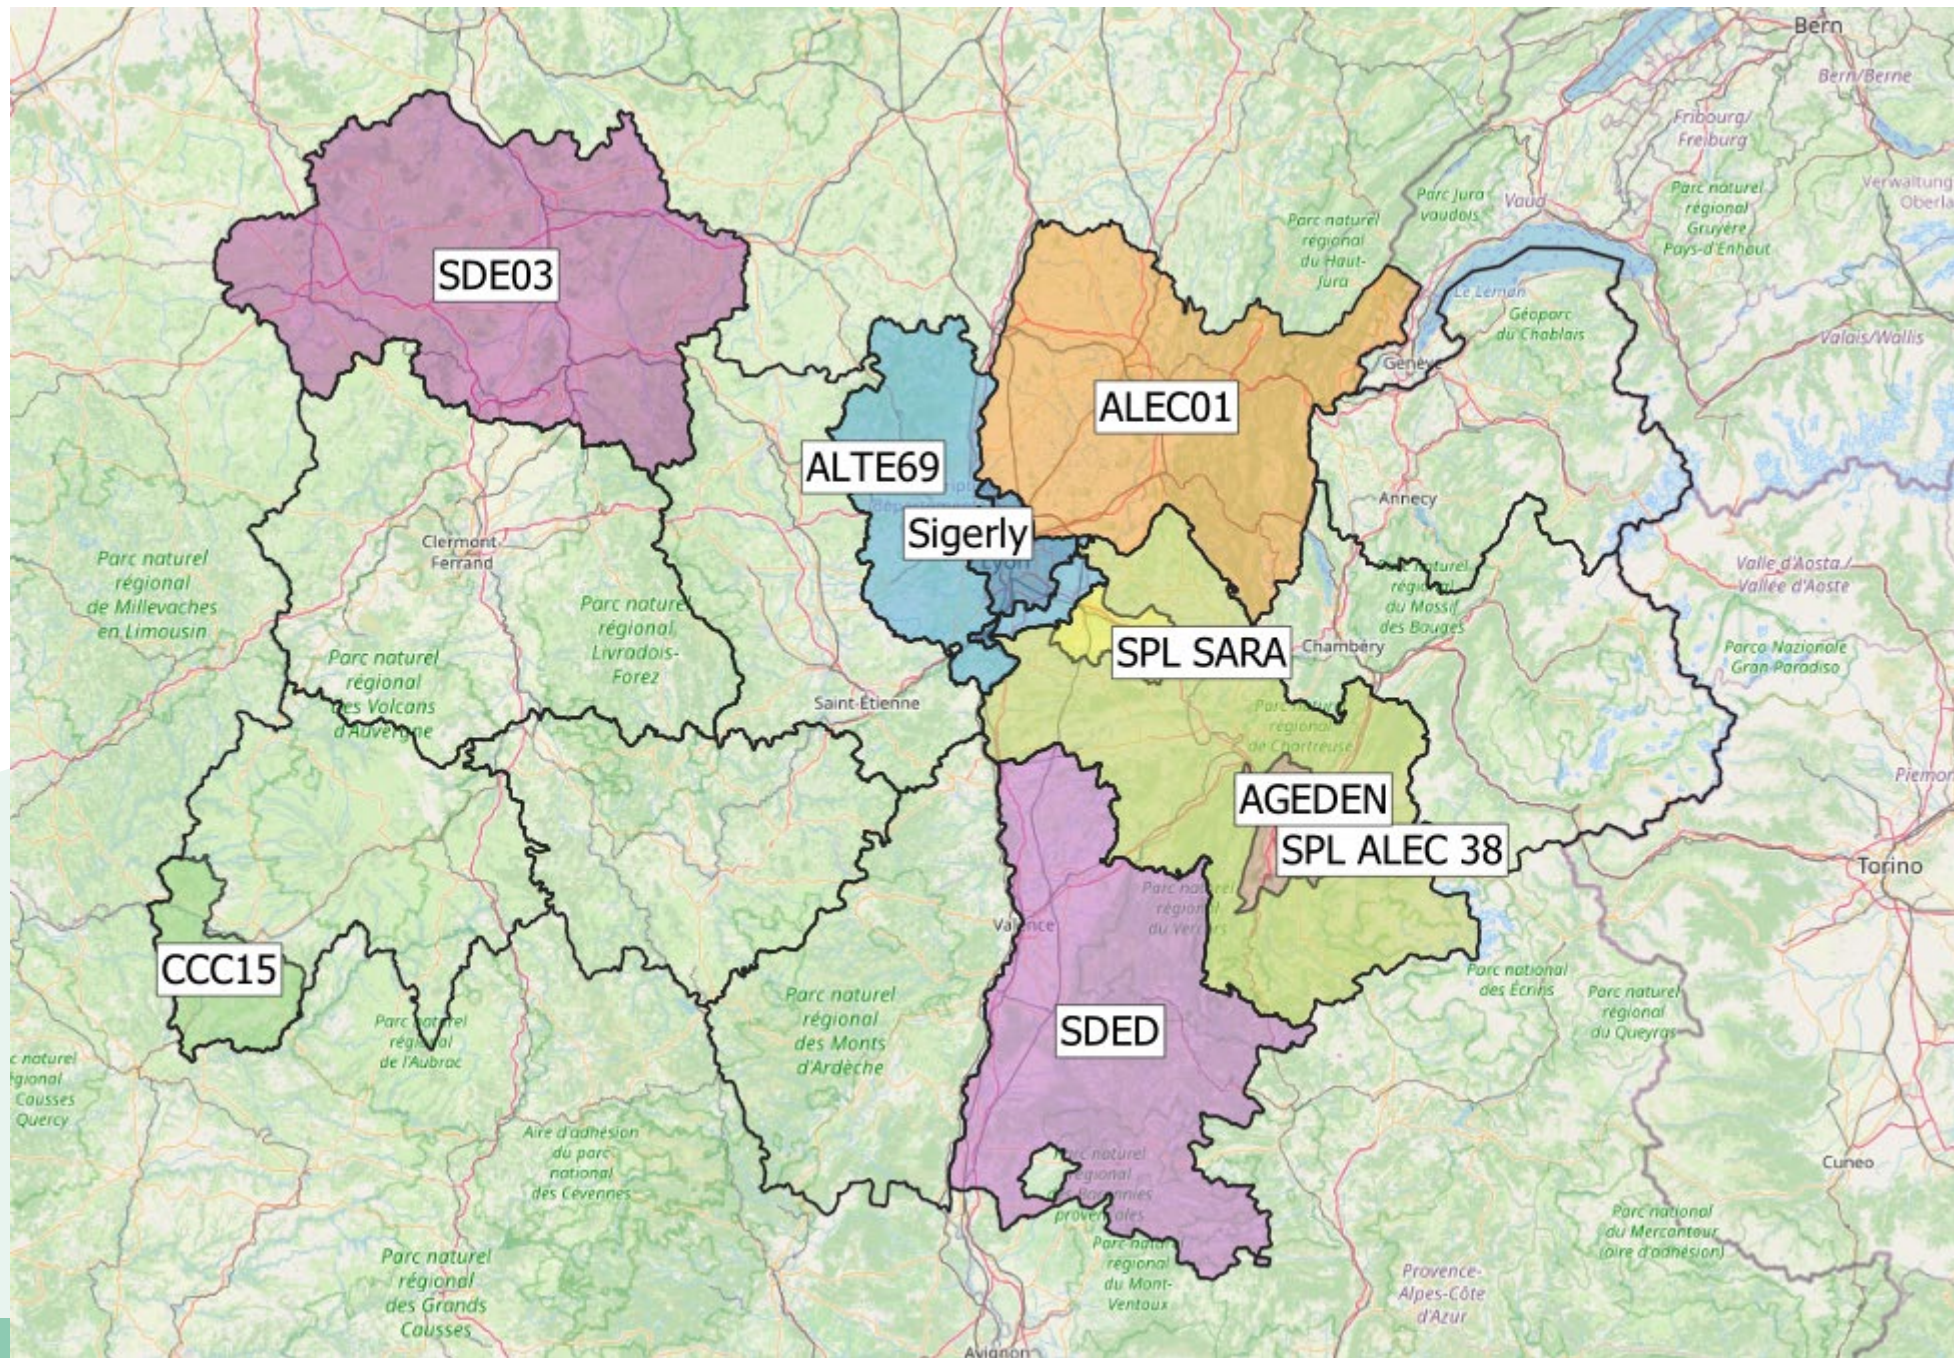

- Renovate 115 public buildings
- Invest 23.7 million € in energy savings works
- Generate 7.8 GWh/year of energy savings
- Build a replicable renovation support service that allows any small or mid-sized municipality to renovate their building stock

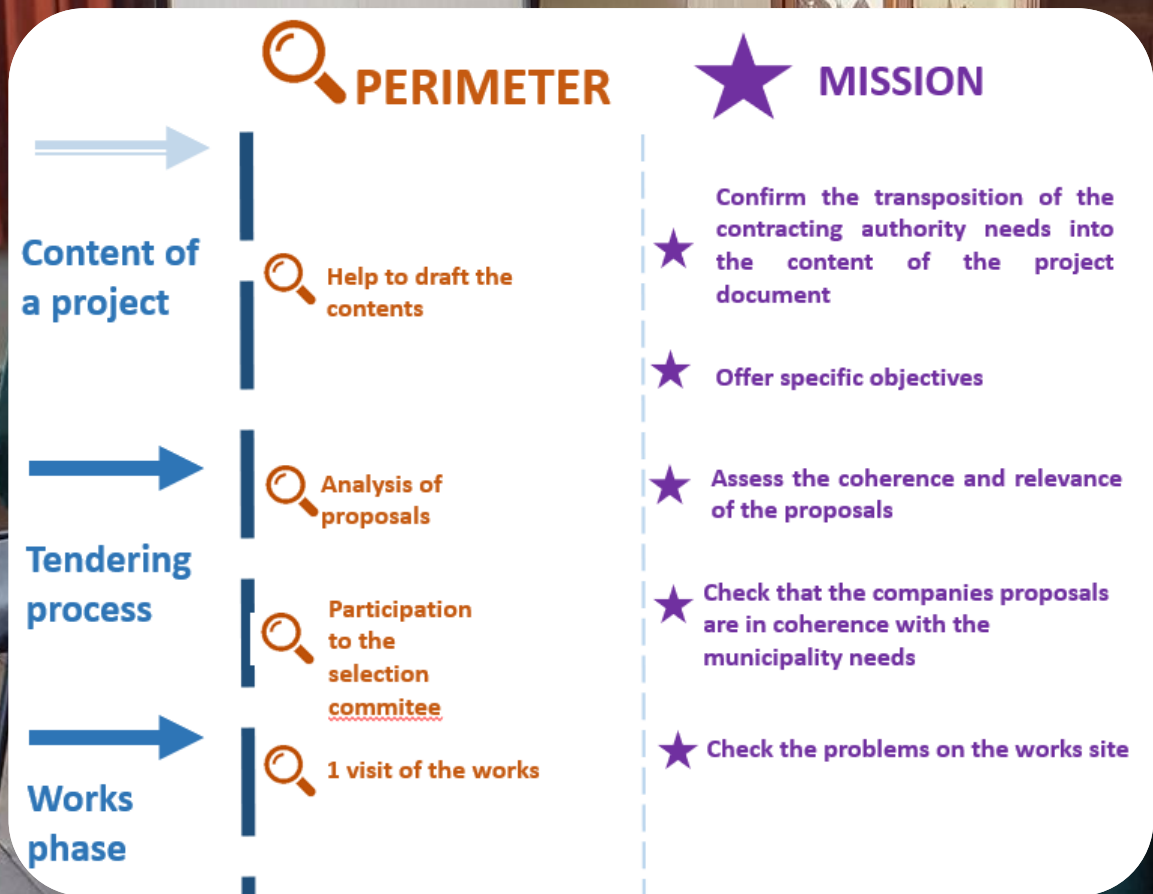

# BAPAURA Commissioning

- Quality service during the life of the project
- Coordination between actors of the project (municipality services, works companies, consultancies, ...)
- Unbiased technical, financial and administrative support to the municipality

# 3 key points to remember

## **1 – A community of advisors who are trained, and share experiences**

In BAPAURA, 11 partners work together, share tools, best practices, ...

And provide the best service to their municipalities!

# 3 key points to remember

## 2 – Political commitment at 2 levels :

- Municipalities must be willing to make renovation works. It must be a political goal, not only the business of a technical team.
- To have an efficient service, there must be a pooled and skilled service. There must be a political will to pay for this service, organize it, ...

In BAPAURA the service is supported by associations of municipalities, or groups of municipalities

# 3 key points to remember

## **3 – Trust between the advisor and the municipality**

The municipality should involve the advisor from the very beginning of the project, and not wait for problems before calling to them (it will be too late to intervene efficiently).

Municipalities should also trust their advisors, and take into account the advice they give.

The background features abstract geometric shapes. A light green shape is on the left, and a light orange shape is on the right. Both have darker, solid-colored borders. The text is centered in a green font.

Thanks for your attention!
