

International *Prionotropis* conservation Symposium

Zoom-meeting, 3 December 2021, 2 p.m. CET

© Les Fées Spéciales

We kindly ask you to register your participation on the following website in order to send you the Zoom link: <https://forms.gle/A1uwQDK2oo8vwS1Z7>

Programme

Axel Hochkirch	Introduction
Lisbeth Zechner	<i>Prionotropis</i> travel impressions 2021: observations, habitats & threats
Sílvia Pina	<i>Prionotropis flexuosa</i> in Portugal: overview and conservation status
José R. Correas	On phenology, status and distribution of <i>Prionotropis flexuosa</i> in Spain
Josep Maria Olmo Vidal	The genus <i>Prionotropis</i> in Catalonia: distribution, management and conservation
Stéphane Bence & Yoan Braud	<i>Prionotropis azami</i> , an endangered species
Michèle Lemmonier-Darcemont & Christian Darcemont	Strategic conservation issue for <i>P. willemsorum</i>
Stanislav Gomboc	Status and future of <i>Prionotropis hystrix</i> in Slovenia
Hasan Sevgili & Deniz Şirin	Notes on the poorly-known steppe species: <i>Prionotropis maculinervis</i>
Laurent Tatin, Axel Hochkirch & Lisbeth Zechner	Conservation strategy Crau plain grasshopper & LIFE-projet SOS Crau Grasshopper 2021-25
<p>Discussion</p> <p>Common habitat requirements of the species? Main threats to each species? What kind of measures should be developed for each species? First steps for further cooperation? What kind of cooperation and transfer of knowledge and methodology is possible within the LIFE project SOS Crau Grasshopper? Could the elaboration of a joint conservation project (e. g. LIFE) be an objective to improve the conservation status of several species?</p>	

Organised within the framework of the LIFE20 NAT/FR/000080 SOS Crau Grasshopper, action E4
 With the support of Axel Hochkirch (ICUN SSC grasshopper specialist group)
