Policy context of cross-border projects in the field of renewable energy

Catharina Sikow-Magny, Director
Green Transition and Energy System Integration, DG Energy

Virtual Info Day
10 March 2022
On 14 July 2021, the European Commission adopted a set of proposals to make the EU's climate, energy, land use, transport and taxation policies fit for reducing net greenhouse gas emissions by at least 55% by 2030, compared to 1990 levels.

Reducing greenhouse gas emissions by at least 55% by 2030 requires higher shares of renewable energy in electricity production and greater energy efficiency.
# EU Funding for renewables in 2021-2027

Regional Cooperation under the 2030 framework

- Preparation of NECPs
- Opening of Support Schemes & Cooperation Mechanisms
- Union Renewables Financing Mechanism
- Connecting Europe Facility (Cross-border RES projects)
- Next Generation EU/ Recovery Plans

Enhanced Framework for Regional Cooperation under 2030 Framework
Objectives of the new CEF window for cross-border projects in the field of renewable energy

- Joint planning, development & cost effective exploitation of renewables and EU target achievement
- Facilitate RES integration through energy storage and conversion facilities
- Promoting cooperation between Member States and 3rd countries based on mechanisms in RED II
- Contribute to strategic uptake of innovative renewables technologies
- Contribute to the EU's Long Term Decarbonisation Strategy
Thank you
