

Joint workshop

LIFE RIPARIAS / LIFE MICA

Towards a data standard for reporting on IAS management interventions

Joint workshop LIFE RIPARIAS / LIFE MICA

Towards a data standard for reporting on IAS management interventions

25 march 2022, 9:30-13:00 CET

Online participation link:

<https://bruxelles-environnement.webex.com/bruxelles-environnement/j.php?MTID=maae17d0172746ec32363e9a124e7dbb2>

Aims

- To work actively towards the development of a data standard for reporting on management which could be presented at the upcoming TDWG¹ conference in October 2022 (TDWG is a world organization maintaining Biodiversity Information Standards)
- To gather insight for developing the management reporting system (Action A.2.2 Develop a system to report on management actions & effectiveness) within the Belgian RIPARIAS project²
- To share good practices & ideas on monitoring / reporting on management of IAS of Union Concern

Outputs

- kick-start a longer term process towards the development of a data exchange format for management reporting ratified by an international Biodiversity Information Standards organisation (TDWG)
- A jointly drafted discussion paper describing a prototype standard to exchange information on wildlife management (focusing on Union List IAS). This paper will provide the framework for collaboration with all contributors (co-authors selected from standard development, use cases, field managers)
 - Initial proposal for standard v0.1 (lead by INBO)
 - Workshop to review initial proposal, gather feedback and use case
 - Create standard v0.2
 - Present standard v0.2 at TDWG (October 2022)
 - Create standard v0.3
