

Policy context and key messages to CB RES projects

Vasil Stoyanov, Unit C.1 Renewables and Energy
System Integration Policy, DG Energy

Virtual Info Day

17 November 2022

New policy developments since the call for status

- REPowerEU proposal from May for **increased EU target for renewable energy by 2030 – 45%, together with streamlining of permitting procedures**
- **Emergency regulations** on addressing the continuous energy crisis:
 - September Regulation to reduce electricity demand and capture unexpected energy sector profits
 - October proposal on better coordination of gas purchases, exchanges of gas across borders and reliable price benchmarks high energy prices
 - November proposal to accelerate the deployment of renewable energy sources.
 - Reducing greenhouse gas emissions by at least 55% by 2030 requires **higher shares of renewable energy** in electricity production and **greater energy efficiency**
- Advance of the **negotiations on the Renewable Energy Directive**

Key policy aspects to be reflected

- **Focus on renewable generation as main objective of the call**
- Different approach between '**RES**' and '**non – RES**' components
- **Studies:** not relevant; 'project as a whole' approach
- **Works:**
 - priority for RES components
 - margin for non-RES components subject to Article 7(4) of CEF Regulation and Article 3 of the Delegated Regulation 2022/342
 - Avoid overlaps with TEN-E and CEF-PCI funding
